

Extraction box LKZ 10/10-6M 3/4M

Product codes:

Reference: 9046C

EAN13: -

UPC: -

Product description:

Material and Design

- Structure made of **galvanized steel** with anti-corrosive treatment.
- Turbine with blades facing forward made of galvanized steel.
- **Includes blind cover.**
- **Electrical connection via junction plug.**
- Robust and compact design with resistant materials to corrosion.

Technical Specifications

- **Motor:** High efficiency (HE), in accordance with ErP 2015 regulations.
 - **Type of motor:** Closed, with built-in thermal protector, class F, with ball bearings.
 - **Protection:** IP54.
 - **Speed:** 900 rpm (1 speed).
-

-
- **Voltage:** Single-phase 220-240 V AC – 50 Hz.
 - **Power:** 550 W.
 - **Air flow:** 3950 m³/h.
 - **Sound level:** 70 dB.
 - **Air temperature to be transported:** -20 °C to +60 °C.
 - **Capacitor:** 25 µF.

Included Equipment

- Extraction box with pre-assembled turbine.
- Blind cover.
- Electrical connection plug.

Additional Features

- Quiet and efficient operation.
- Ideal for centralized ventilation systems or localized extraction areas.
- Durable components designed for industrial environments.

Product features:

Power Supply Voltage: 220-240V 50Hz
Power Watts: 550W
Hospitality Furniture: Bells Accessories
Bells Accessories: Extraction Box

Product short description:

High-performance extraction box designed for industrial and commercial ventilation systems. It offers excellent airflow capacity with low maintenance, ideal for demanding applications where reliability and energy efficiency are required.
