

Extraction Box LKZ 12/12-6M 1 1/2M

Product codes:

Reference: 9050C

EAN13: -

UPC: -

Product description:

Material and Design

- Enclosure made of **galvanized steel sheet** with anticorrosive treatment.
 - Turbine with forward-curved blades, also in galvanized sheet.
 - **Includes blind cover** to facilitate installation in extraction systems.
 - Electrical connection via **splice connector**.
 - Resilient, compact design prepared for intensive use.
-

Technical Specifications

- **Motor:** High efficiency, compliant with ErP 2015 regulation.
- **Motor Type:** Closed, with built-in thermal protector, class F, with ball bearings.
- **Protection:** IP54.
- **Speed:** 900 rpm (1 speed).
- **Voltage:** Single-phase 220V AC – 50 Hz.
- **Power:** 1,100 W.
- **Air flow:** 7800 m³/h.
- **Sound level:** 75 dB.
- **Air temperature to be transported:** -20 °C to +60 °C.

Included Equipment

-
- Extraction box with pre-mounted turbine and motor.
 - Blind cover.
 - Electrical connection connector.
-

Additional Features

- High extraction flow for large spaces or with high thermal load.
- Silent operation in relation to its power.
- Durable and resilient materials for demanding environments.
- Compatible with centralized or local ventilation installations.

Product features:

Power Supply Voltage: 220-240V 50Hz

Power Watts: 1100W

Hospitality Furniture: Bells Accessories

Bells Accessories: Extraction Box

Product short description:

High-performance industrial extraction box, designed to move large volumes of air in installations requiring power, efficiency, and reliability. Ideal for demanding applications in professional kitchens, industrial warehouses, and general ventilation systems.
