

Gas regulator 20 mbar Blue bottles Camping gas RCG

Product codes:

Reference: REP0007009

EAN13: -

UPC: -

Product description:

The regulator for camping gas bottles connects to the valve of the bottle via a threaded connection, reducing the pressure inside the bottle to the service pressure of butane at 29 mbar. The regulator is equipped with a control knob for opening and closing.

The outlet nozzle is adjustable and can be rotated 360°, making the connection of the regulator to the consumption devices more comfortable and safe.

It incorporates a flow excess cut-off device that stops the gas supply in case of pipe rupture or disconnection. Its reset is manual, which means that once the cause of its activation has been resolved, the user must close and reopen the regulator's control knob.

INPUT CONNECTION: M 16x1.5

OUTPUT CONNECTION: Nipple 10 ø according to UNE EN 12864 fig. H.51
