

Management for Businesses

Product codes:

Reference: GCO

EAN13: -

UPC: -

Product description:

Management for Businesses is the ideal solution for businesses or establishments dedicated to the sale of any type of merchandise, characterized by its **speed, agility, and above all simplicity**.

The application has two sales modes, the **traditional mode** and is also **adapted** to work with **touch screens**. In both modes, a barcode reader can be used. You will notice that **the time spent on creating a ticket is minimal**, as we understand that you should spend your time on making the sale, not on creating a sales ticket.

The program allows you to control the main data needed by any type of establishment, such as items, customers, invoices, cash, suppliers, etc. Given the flexibility it offers, it can adapt to a large number of different types of businesses.

The application is designed for businesses such as **STATIONERY STORES, HARDWARE STORES, DOLLAR STORES, BAZAARS, WATCH SHOPS, JEWELRY STORES...** in short, any type of business that needs to quickly and comfortably record a sale.

Hair Salons, Aesthetics, Beauty Salons...

The ideal program for hair salons, aesthetic centers, beauty salons, or similar, as it allows for stock control of products, cash management... and it is also necessary to have a series of specific features for managing the establishment.

Special features of iaTPV for Hair Salons, Aesthetics, Beauty Salons...
