Product description:

radial ball bearing shaft Ø 17mm Ø ext. 35mm Width 10mm type DIN 6003-2RSR

shaft diameter 17 mm

external diameter 35 mm

width 10 mm

type DIN 6003-2RSR

HBS-220 HBS-250

Single-row **deep groove ball bearings** are generally used in electric motors. With a price-performance ratio, they provide radial and axial load capacity, are optimal for high speeds with low noise levels. In sealed version, they are lubricated for life.

The product range covers all inner diameters from 6 mm to 85 mm. Deep groove ball bearings are the quietest bearings. The standard deep groove ball bearing from **FAG** achieves the best

Shop name

ratios due to the quality of the components and the internal design from the smallest to the largest diameter, aiming to achieve the highest load capacity with the quietest operation.
