Product description:

radial ball bearing shaft $\varnothing$ 30mm outer $\varnothing$ 55mm width 16mm type DIN 6006-2RSR

shaft diameter 30 mm

outer diameter 55 mm

width 16 mm

type DIN 6006-2RSR

Single row **deep groove ball bearings** are generally used in electric motors. With a price-performance ratio, they have radial and axial load capacity, are optimal for high speeds with low noise levels. In the sealed version, they are lubricated for life.

The product range covers all inner diameters from 6 mm to 85 mm. Deep groove ball bearings are the quietest bearings. The standard deep groove ball bearing from **FAG** achieves the best ratios thanks to the quality of the components and the interior design from the smallest to the largest diameter, aiming to obtain the highest load capacity with the quietest operation.
