Product description:

radial ball bearing shaft $\varnothing$ 35mm $\varnothing$ ext. 62mm width 14mm type DIN 6007-2RSR
shaft diameter 35 mm
outer diameter 62 mm
width 14 mm
type DIN 6007-2RSR

Single-row **deep groove ball bearings** are generally used in electric motors. With a price-performance ratio, they have radial and axial load capacity, are optimal for high speeds with low noise levels. In the sealed version, they are lubricated for life.

The product range covers all inner diameters from 6 mm to 85 mm. Deep groove ball bearings are the quietest bearings. The standard deep groove ball bearing from **FAG** achieves the best ratios thanks to the quality of the components and the internal design from the smallest to the largest diameter, aiming to achieve the highest load capacity with the quietest operation.
