

Automatic Orange Juicer SUCCO

Product codes:

Reference: 1771S

EAN13: -

UPC: -

Product description:

Juicer for making completely automatic juices

You only need to place the oranges in the basket, without cutting or peeling them.

The waste is deposited in the tubs on both sides.

It accommodates oranges with a diameter of 40-80 mm with a yield of 20 oranges per minute.

Versatility and functionality come together in this juicer, which prevents acidity by not crushing the peel, ensuring that the juice itself does not come into contact with the peel.

- Plastic tubs in orange color.
- Metal gears.
- Gearbox with easy access for repairs.
- Metal rings to protect the shafts.
- Safety switch.

Product features:
