

100 liters gas cylindrical kettle direct heat Series 900 7855

Product codes:

Reference: 7855

EAN13: -

UPC: -

Product description:

- Round or rectangular kettles are suitable for cooking stir-fries or boiling all types of food products.
- Monoblock tank of up to 250 liters for easier cleaning and durability.
- The double-skin lid increases the insulation of the cooking vessel and has a hinged and counterbalanced mechanism to facilitate opening and closing.
- The tightly fitting lid reduces cooking time and saves energy costs.
- Equipped with robust micro-perforated stainless steel burners with a flame failure device for greater safety.
- Additional insulation material throughout the cooking vessel to minimize energy costs.
- Energy regulation through a control knob.
- The large-capacity drain tap allows for easy food discharge.
- The pressure gauge allows for the correct monitoring of the vessel's operation.
- The external valve allows for the manual evacuation of excess air accumulated during the heating phase.
- In gas models, the electronic ignition system increases convenience, and the user can visually monitor all types of operational status through indicators located on the front panel.
- The appliance is equipped with solenoid valves for hot-cold water and a chrome spout

located on top for filling the tank.

- Capacity: 100 liters.
- Power: 22Kw.
- Net weight: 88.80 KG
- Power supply voltage: 220-240 V / 50 Hz
- Gas LPG

Product features:

Type: Con mueble

Measure:

Heat: Tilt Skillet

Gas-Electric-Induction-Oil: Gas
